

# SMARTCONTROL EXCA234CAT5/ 235CAT5

Available in multiple body styles see website.

## Features

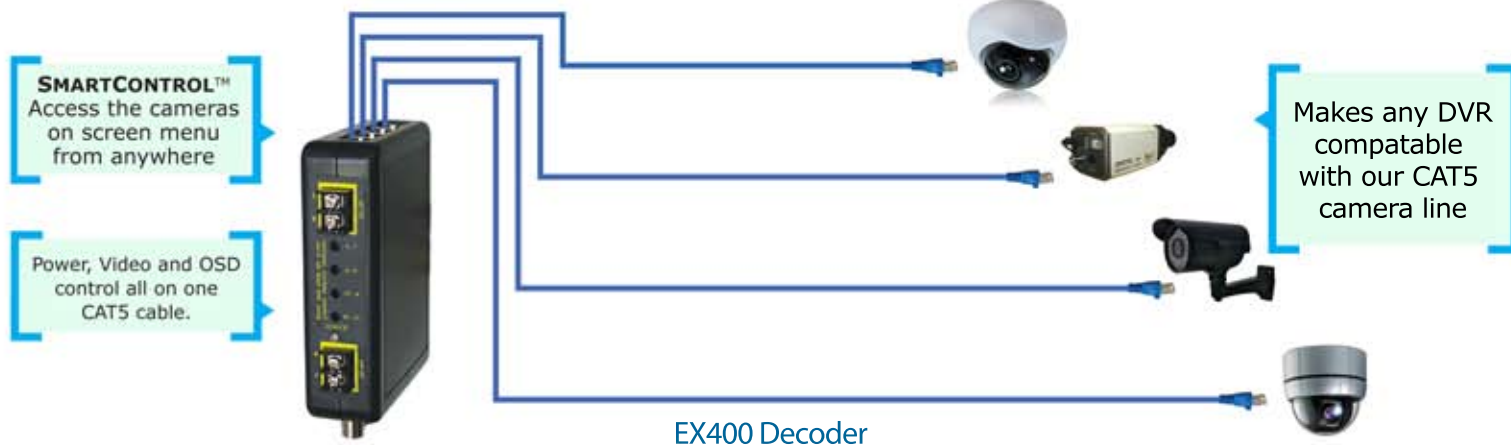

### Never Go Back to a Job Site Again!

- Smart Power- Our cameras use our own power circuitry that isolates the ground from the power, eliminating the rolling bars that plague so many installs
- Easy Connect CAT5- Our CCTV cameras operate on a single, inexpensive and readily available CAT5 data cable which carries the video, power, and control of all the cameras OSD functions. (These are not IP cameras)
- All our CAT5 cameras function perfectly at any distance up to 750 ft.
- Instaset (Pre-Programmed Scene Settings) – Get a perfect picture in all environments with just the touch of a button. We have taken all the guesswork out of the camera set-up so that you do not have to have a full understanding of each of the menu terms.
- Universal compatibility – Our CAT5 solution is compatible with all DVR's through our EX400 Decoder.

## Summary

### WORLD'S FIRST "TRUE" CAT5 SOLUTION

Our CAT5 Solution is a patent pending solution which transmits power, video, and OSD (advanced OSD functions) camera control all in one, easy to connect, CAT5 cable. Where others use a toggle or joysticks to control OSD functions within the camera, Innotech's SmartControl allows all the OSD functions remotely from anywhere in the world so long as you can login into your DVR.

## Features of our SMARTCONTROL™ Technology

- Easy Connect CAT5 - Our cameras operate off a single, inexpensive and readily available CAT5 data cable which carries the video, power and control of all the cameras on screen display functions.
- All our CAT5 cameras function perfectly at any distance up to 750ft.
- Save \$\$\$ on cable, installation time and going back to the job site to adjust cameras.
- The only High End system that is truly plug and play and offers total control.
- Instaset (Pre-programmed scene settings) – Get a perfect picture in all environments with just the touch of a button. We have taken all the guesswork out of the camera set up so that you do not have to have a full understanding of each of the menu terms. Great for quick set up. (i.e. Color@Night™, direct bright light, digital zoom etc.)
- Smart Power - Our camera incorporates our own power circuitry that isolates the ground from the power, eliminating the rolling bar that plagues so many installs.
