

CAT5 Outdoor Vandal Dome Camera

Power, Video and Complete OSD Control Over Single CAT5 Cable

EXCA234CAT5 P

Features

Patent pending technology, True plug and play CAT5 solution, just plug any standard CAT5 cable with RJ45 plug directly to the camera (no external components). CAT5 cable is less expensive, easier to work with and is the preferred cable now and for future technologies (future proof your infrastructure).

Built in SmartControl Technology allows you to adjust all of your camera controls over the internet, no more running back to job sites to make final adjustments. With this proprietary technology all you need to do is run one CAT5 cable that will supply Power, Video and Control.

Sensor Selection

To select the sensor add the coordinate letter to the end of part number

"P" = Seawolf the latest sensor by PIXIM the ultimate WDR technology plus great low light sensitivity for night operation.

Specifications
